

WATER

**Water is life, the essence of all
Yet we waste it, let it fall
We take it for granted, think it's forever
But it is a finite resource, we must be clever.**

**Save water, every drop is vital
Don't leave it running. It's wasteful
Fix leaks, turn off taps
Conservation is what we need
Make it a wrap**

**A simple act, a small gesture
Can make a huge difference, don't measure
Do your part, don't delay
Save water every single day**

**Its up to us to make a change
For future generations we must arrange
Give them the gift of water, clean and pure
Lets conserve it, that's the cure**
